## Professional Summary

Aspiring Software Engineer with strong foundations in **Data Structures, Algorithms, and Object-Oriented Design**. Proven experience in building scalable backend systems and full-stack applications. Skilled in **distributed systems, concurrency, containerization, and cloud-native architectures**.

## Education

### B.Tech in Information Technology (Honors)

Bannari Amman Institute of Technology

Sep 2023 – Mar 2027

CGPA: 8.02

Relevant Coursework: Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Cloud Computing

## Experience

### Software Developer Intern – Rampex Technologies

Aug 2025 – Feb 2026

- Implemented backend APIs and processing workflows in a cloud-native LMS platform, improving availability and reducing deployment failures by **30%**.
- Collaborated on debugging production issues, optimizing database queries, and automating deployment workflows, improving overall system performance and maintainability.

## Projects

### LANturn – Network-Wide Power Orchestration System (<https://lanturn.bitinfra.in>)

- Built a centralized orchestration system managing **300+ machines**, ensuring reliable remote execution.
- Designed retry mechanisms and failure-handling logic to improve reliability of Wake-on-LAN operations.
- Implemented scheduling strategies and backend optimizations, improving operational efficiency by **40%**.
- Simulated failure scenarios to validate recovery workflows and reduce manual intervention by **80%**.
- Tech Stack:** Next.js, Node.js, Express, MySQL, Wake-on-LAN (WOL), Windows RDP

### Terminus Assess – Linux-Based Assessment Infrastructure Platform

- Designed and stress-tested a Linux-based assessment system handling **100+ concurrent users**, focusing on availability and fault isolation.
- Built secure Docker-based execution environments ensuring reproducibility and system stability.
- Implemented automated evaluation pipelines and monitoring checks, reducing operational overhead by **50%**.
- Optimized database indexing and query execution plans, improving system throughput by **35%**.
- Tech Stack:** React, Node.js, Linux, Docker, MySQL, AWS

### FinSense – Data Processing & Analytics Engine (<https://finsense.bitinfra.in>)

- Real-time streaming pipelines to continuously analyze live market data, news, transactions, and customer behavior.
- Engineered optimized data-processing pipelines, reducing execution time by **45%** and memory usage by **30%**.
- Designed modular components enabling reproducible processing and easier fault isolation.
- Tech Stack:** Python, Data Pipelines, Gemini API, Pathway, Next.js

## Technical Skills

|                    |                                                                                       |
|--------------------|---------------------------------------------------------------------------------------|
| Programming        | Java, Python, C, C++(Basics), JavaScript                                              |
| Backend            | Node.js, Express.js, Spring Boot, REST APIs, API Design                               |
| Databases          | MySQL, Database Design, Query Optimization, Indexing                                  |
| CS Fundamentals    | Data Structures, Algorithms, OOP, Operating Systems, Computer Networks, System Design |
| DevOps             | Docker, Kubernetes, Jenkins, Grafana                                                  |
| Cloud & Operations | AWS, OpenStack, Github, Git, Linux CLI                                                |

## Certifications

- Google Professional Cloud Architect – **Google (2025)**
- Cloud Digital Leader – **Google (2025)**
- GitHub Foundations – **GitHub (2024)**
- OCI Foundations Associate – **Oracle (2025)**

## Achievements

- Winner – Code Cubicle Hackathon** (GeekRoom × Microsoft × Pathway)
- Finalist – Smart India Hackathon 2025** (8L+ participants)
- Google Developer Groups Organizer (2025–2026)**
- Microsoft Student Ambassador (2024 – Present)**
